## FT60 Eaves Fascia Tray

### Product Description

Corovent eaves fascia trays support the edge of the underlay at the eaves and provide a uniform drip into the gutter. This allows the underlay to be cut back short of the gutter, protecting it from rotting and UV degradation, and also prevents sagging and water pooling behind the fascia.

- Fits 600mm rafter centres
- Can be fitted directly onto fascia board or onto an over-fascia vent

<b>Product Requirements</b>	<b>FT60</b>
<b>Statutory Requirements</b>	To provide support for the underlay at the eaves and provide a uniform drip into the gutter in accordance with BS5534:2014 and to give support to the roofing felt behind the fascia to stop sagging
<b>Functional Requirements</b>	To provide support for the felt behind the fascia and prevent water pooling and give a uniform drip into the gutter. To fit 600mm rafter centres and be easily fixed.
